

**CRIMINALS
CAN'T HIDE**

Catch the criminals and make your community safer.

Sneaky criminals are hiding all throughout this book and it's your job to spot them. But remember, sometimes criminals work in groups so there might be *more than one*.

RETAIL

When shoppers come from all around,
Welcome! and ***Thank you!***
our machine will sound.

But for those who try to cause a fuss,
Go away! we roar, with decibels of 120+!

CAN
YOU FIND
ME, TOO?

GOVERNMENT

Because we move with rapid pace,
we add protection to any place!

We quickly roll to any scene,
stop the dumpers, and keep cities clean.

We're moved to places with a need
so ***citizens feel safe*** indeed.

Guarding gates and patrolling streets,
where we're deployed the problems cease.

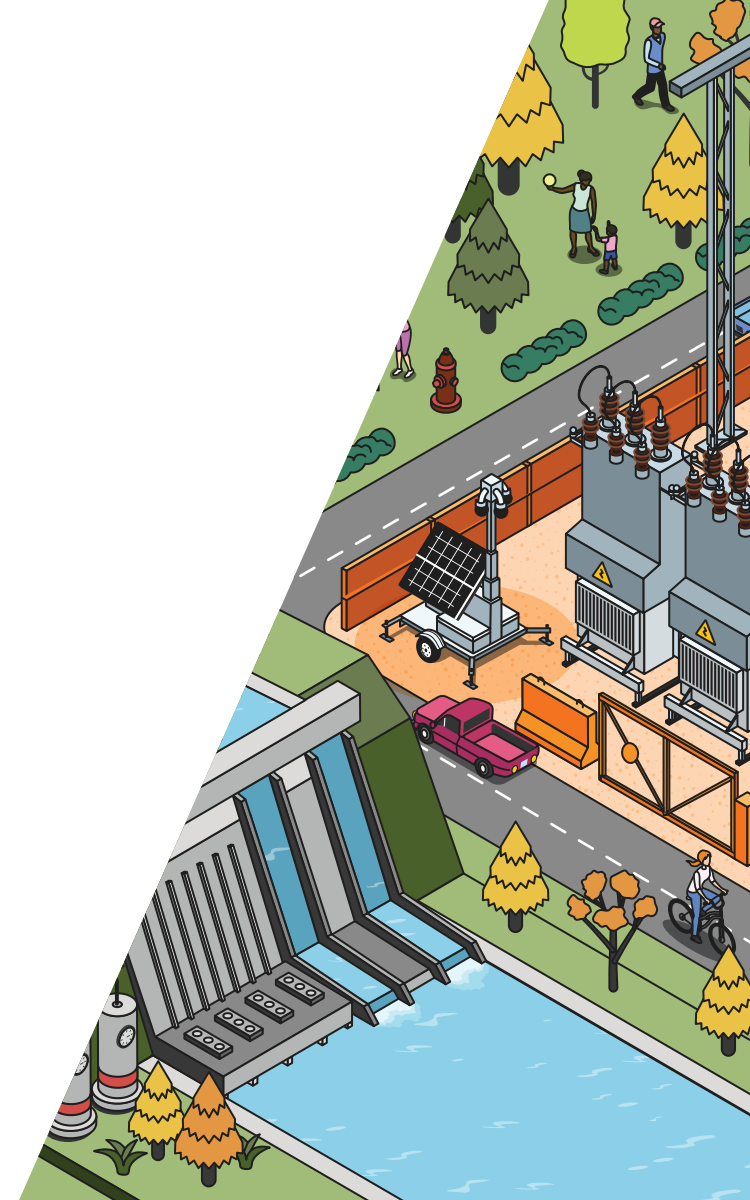

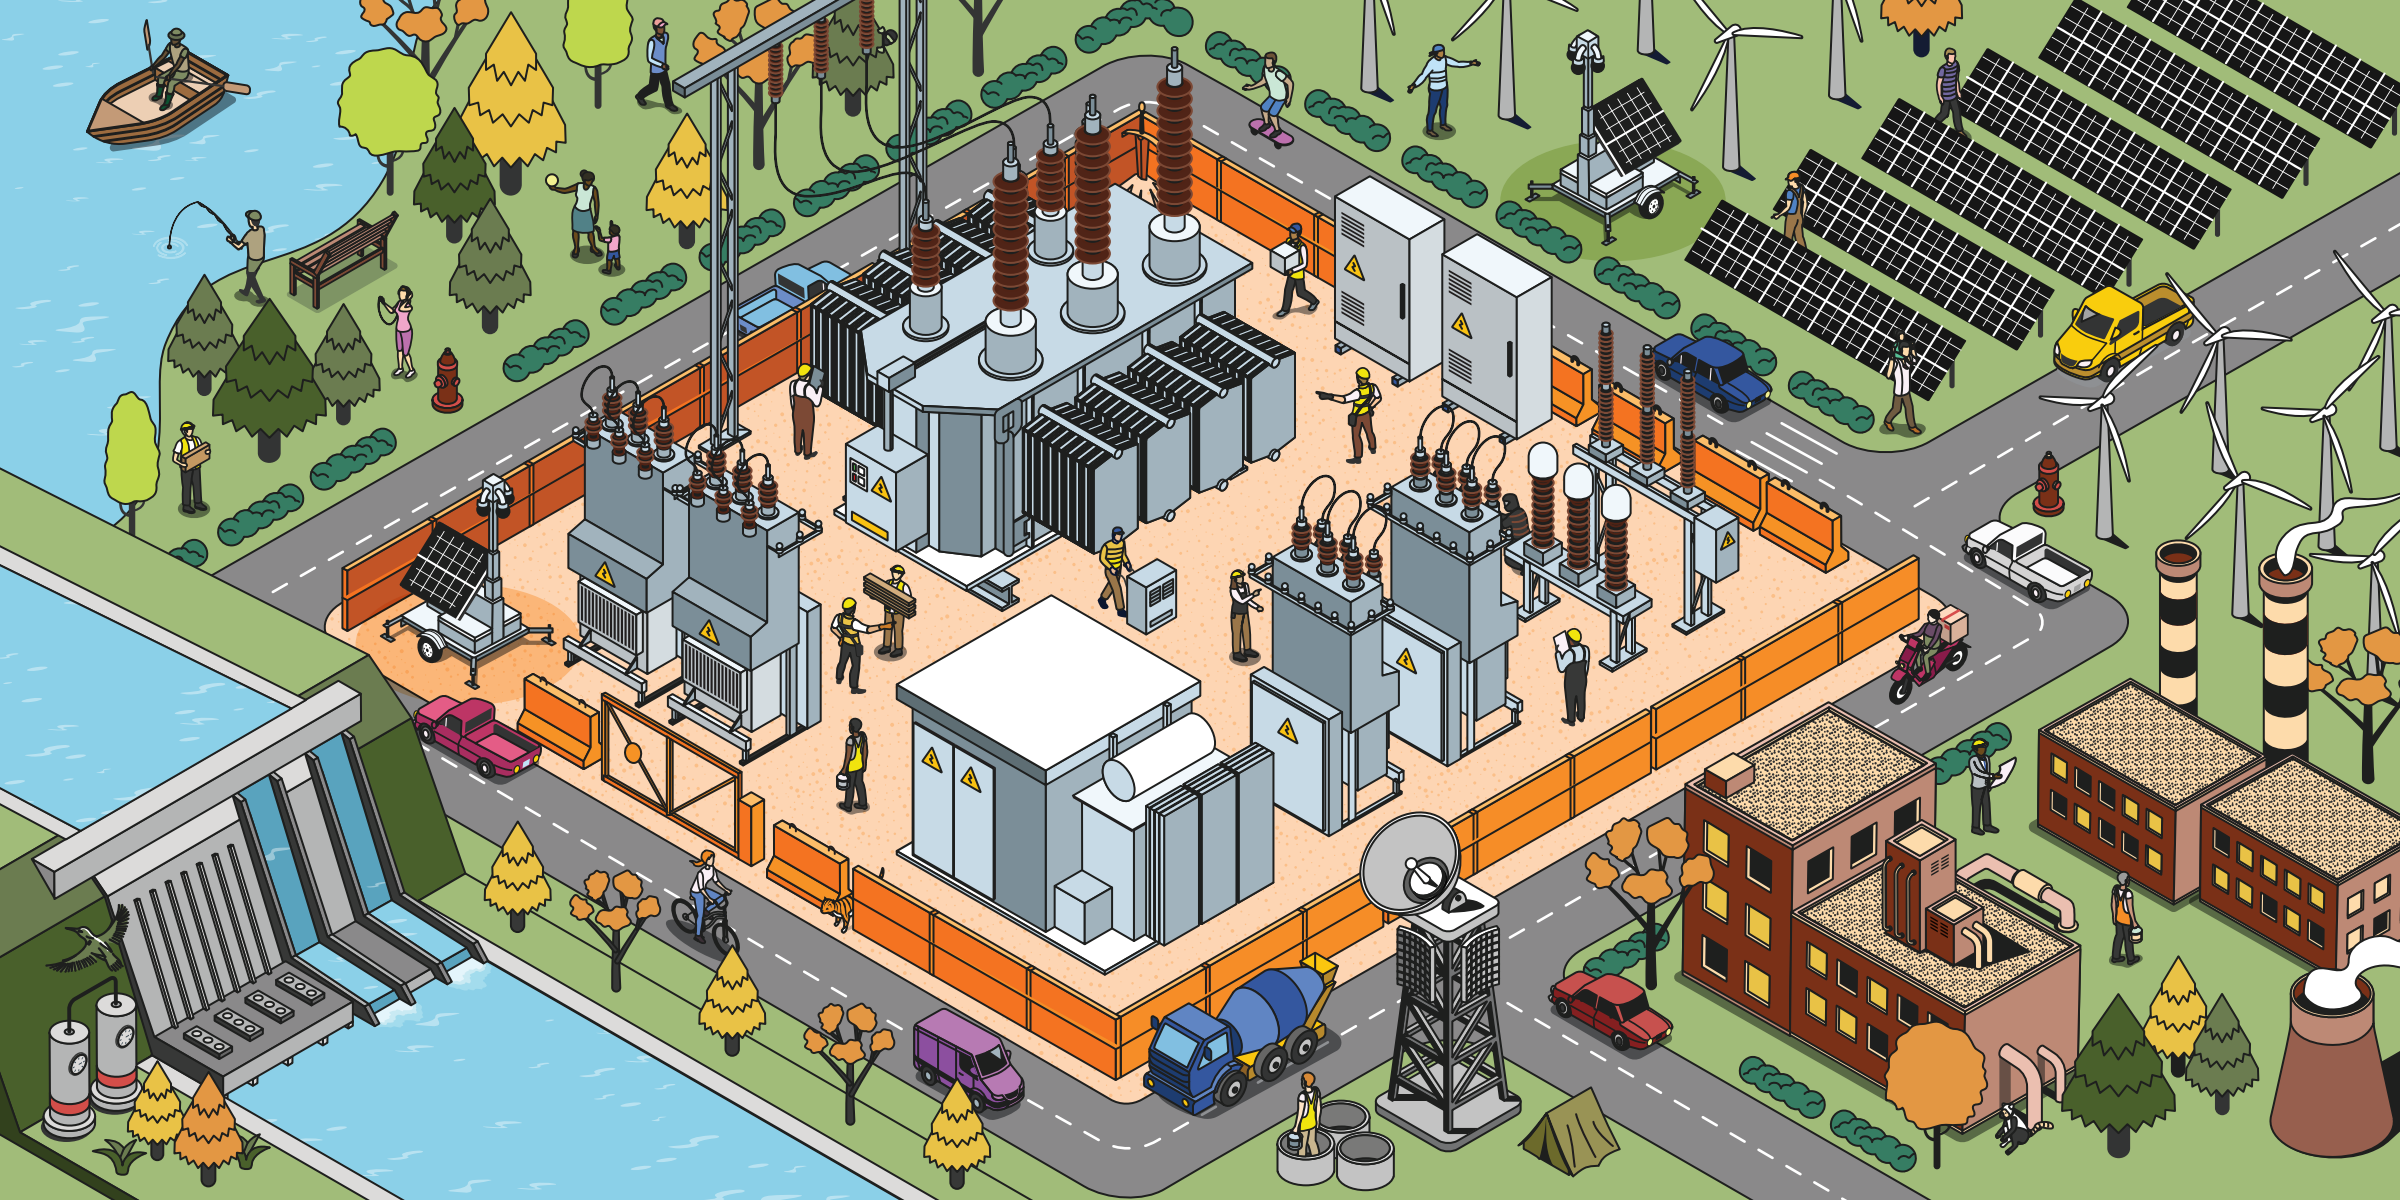

CRITICAL INFRASTRUCTURE

The city lights are all aglow, but
naughty night creepers want to put out the show.

Just a fence won't do, it won't **keep them out**,
you need a smarter solution to be your lookout.

A magical machine that sees far in the night
and past 300 feet can shine its bright light.

HEALTHCARE

At hospitals where people stay
for many hours or even for days,

Caregivers toil with loving care,
but who protects the vehicles there?

With watchful eyes we stand on guard
bringing ***peace of mind*** when the job gets hard.

CONVENIENCE STORES

C-stores stay open all night and day,
but some folks linger and won't go away.

Our cameras start to reconnoiter
and watch for those who like to loiter.

The timer ticks, their stay drifts on,
a message says to ***Move along!***

LOGISTICS

Trucks and trains go **zooming** by
with goodies packed so very high.

But locks can **pop** with just a twist
and items grabbed hand over fist.

Helpers wait to hear the **ding!**
that alerts them of nefarious things.

Quickly they know just where to **click**
to see the video and record clips.

Help comes fast—they're just in time
to stop the baddies from making a dime!

CONSTRUCTION

Where diggers **roar** and hammers **ring**
the builders store some precious things.

Thieves and vandals with a sneaky plan
to destroy or steal whatever they can.

But fear them not, our helper bright,
keeps watch all day and through the night.

With uptime that's beyond compare,
your site stays secure and supplies stay there.

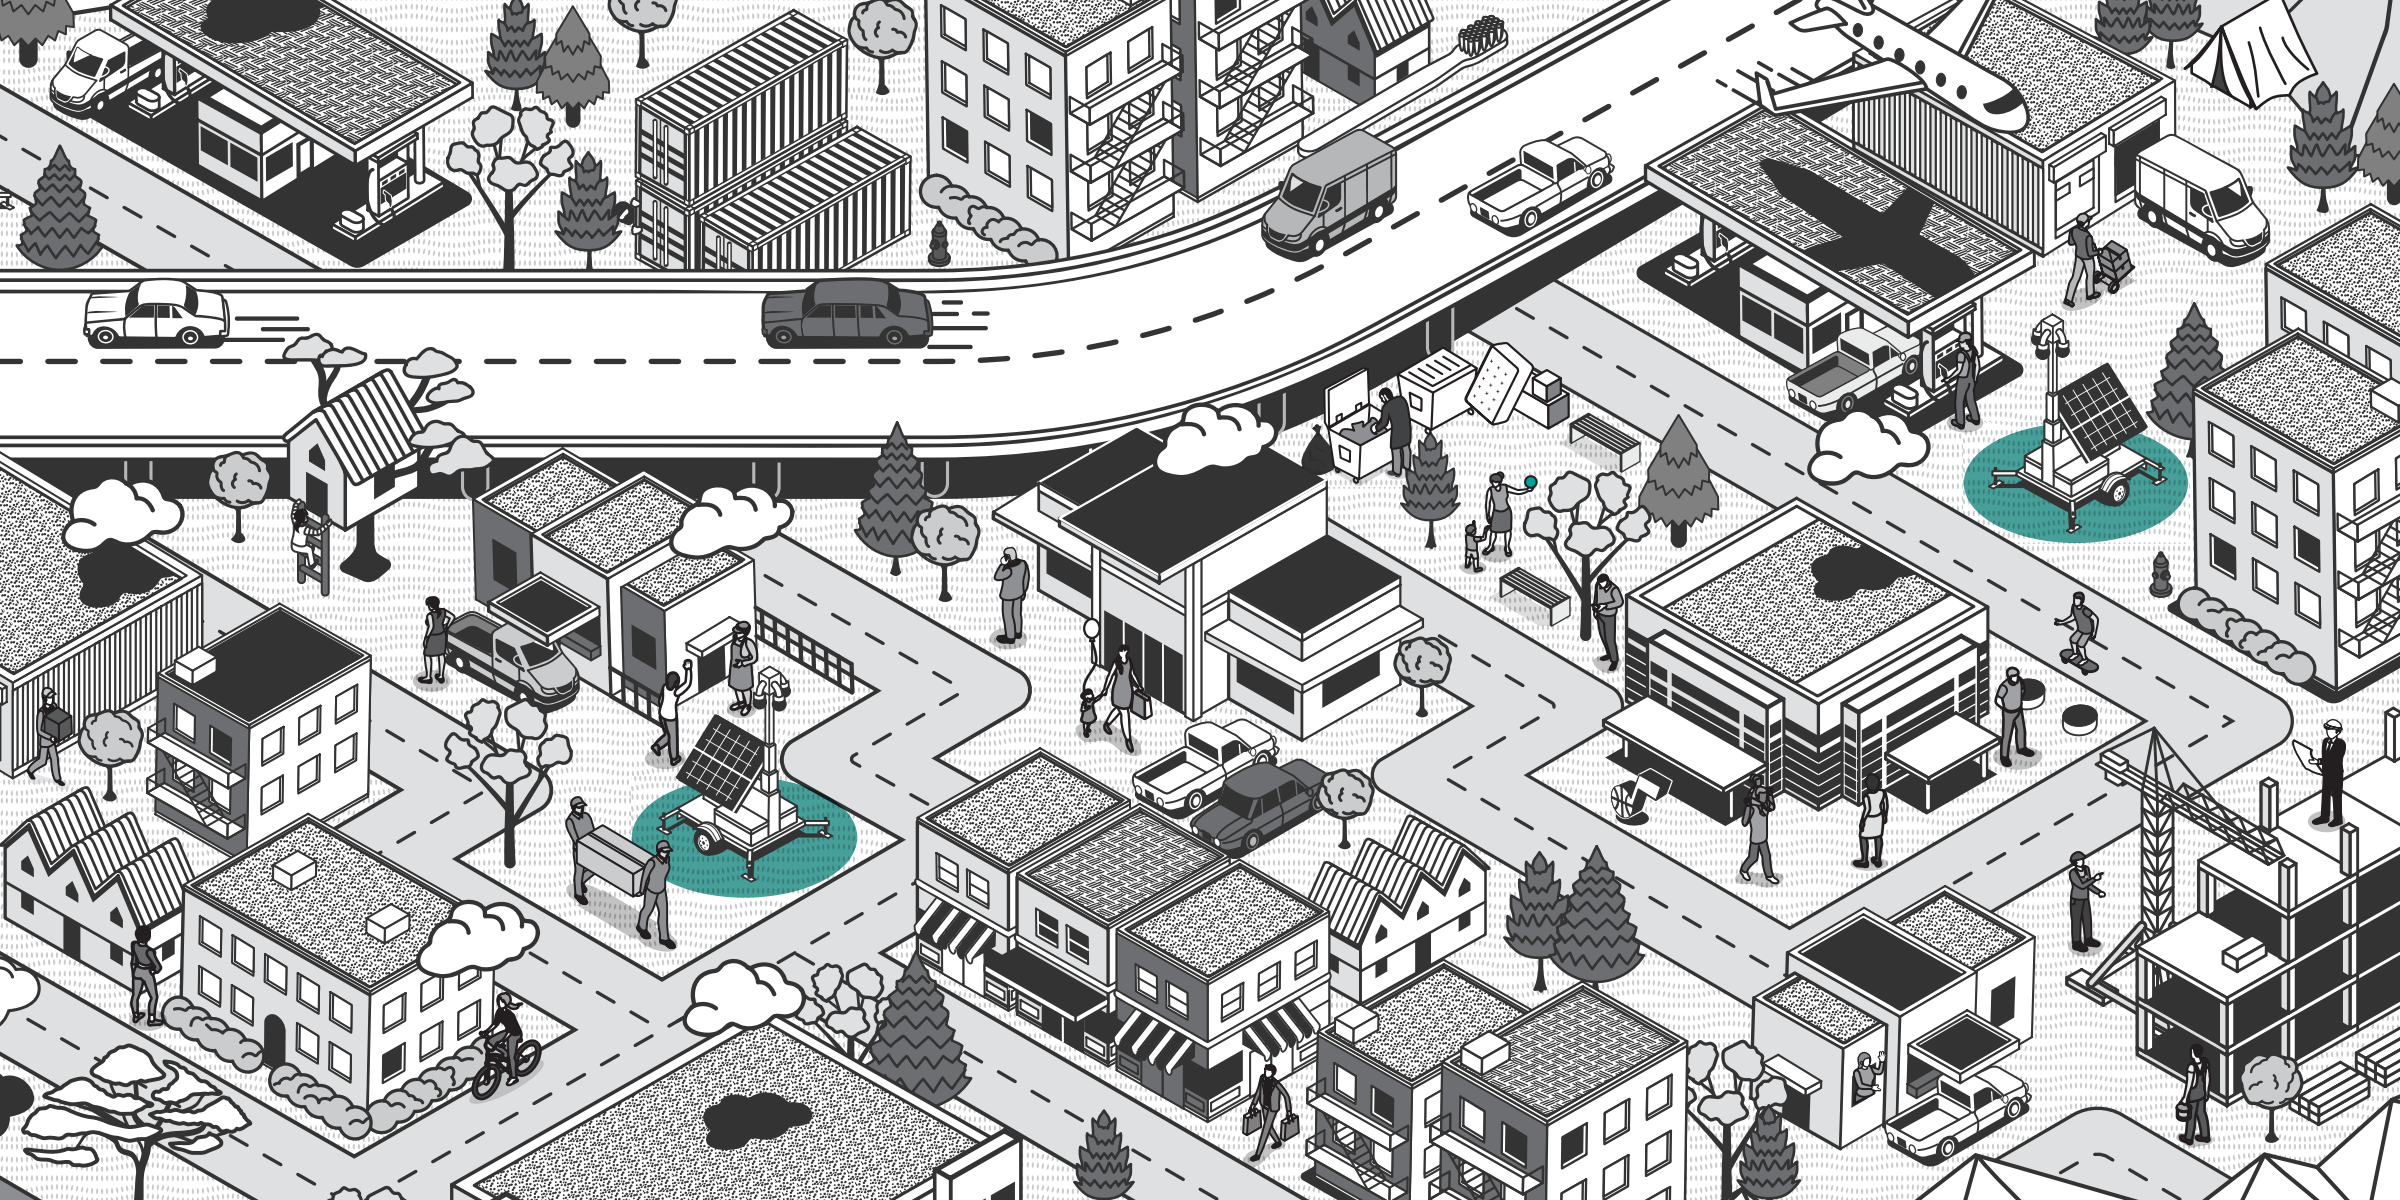

COMMUNITY

Bad guys creep and cause a fright,
but good guys come to make it right.

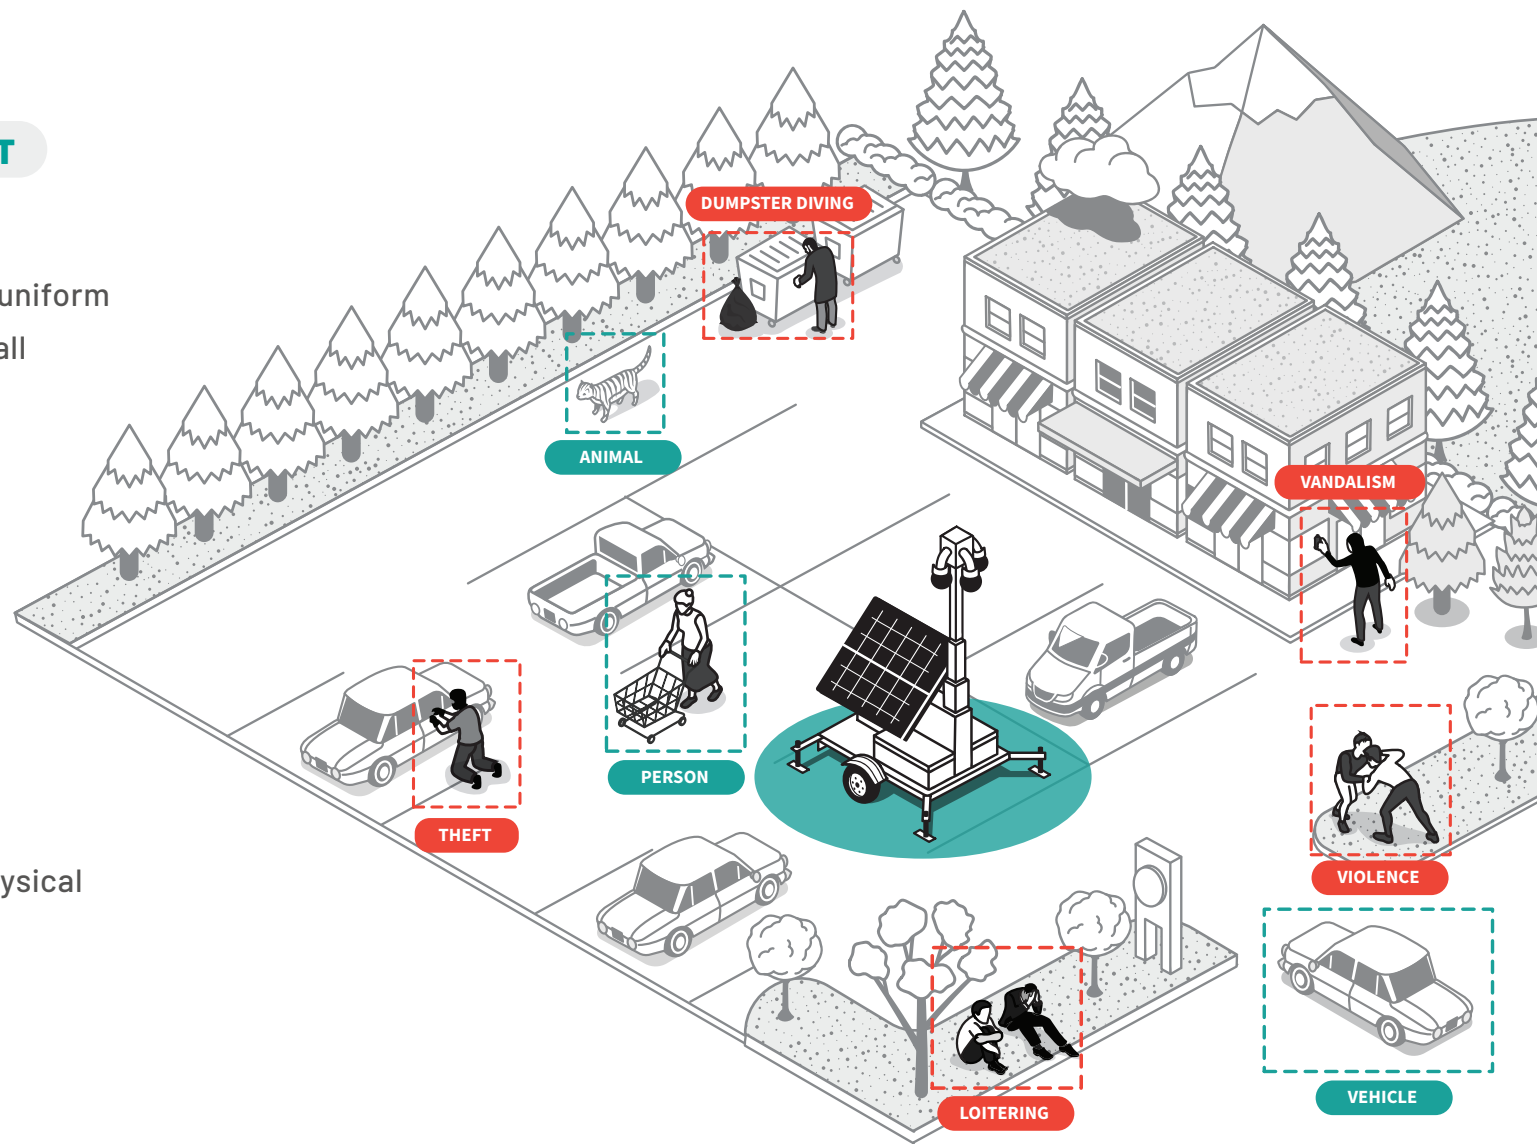

More secure with LVT,
a safer world for you and me.

WHY CRIMINALS CAN'T HIDE FROM LVT

Unlike in this book, criminals don't actually wear a uniform that makes them easy to spot. But you know what all criminals *do* have in common? Criminal behavior. That's why LVT is moving beyond simple object recognition and into the world of agentic AI. Imagine a technology able to recognize behaviors, understand the context of those behaviors to determine whether a threat exists, decide which actions would most likely deter that threat, and then initiating and escalating those deterrents—all without ever involving a human operator. That's the future of physical security, and LVT is making it happen.

DID YOU CATCH THEM ALL?

After you find all **21** criminals *hiding in* this book, scan the QR code for a list of other hidden items to search for.
